Real oil paintings in oil grounds upon canvas, such as has alwas a been regarded by the masters of art as the best receptacle for culors in oil, are now readily produced with all the truth of the deguerrectype in 2dineation, and of living breathing, blouming mature in color, tone and of living, breathing, blooming nature in color, ton

Portraits the size of life may be secured from small da-guerrootypes of persons deceased, with as much truth and accuracy as from the living subject.

The durability of these oil ground photographs is in-sured for a hundred years, if desired, as there is to chem-ical or foreign matter used or introduced that can in any wise affect the permanency or durability of the picture, the ground being the same as has been most approved and that ordinarily used by artists in portraiture and landscape; the vehicles and paints are also the same.
